### Identification Activity

*Child find* refers to activities undertaken by public education agencies to identify, locate, and evaluate children residing in the State, including children attending private schools, who are suspected of having disabilities, regardless of the severity of their disability, and determine the child's need for special education and related services. The purpose is to locate these children so that a free appropriate public education (FAPE) can be made available. The types of disabilities that if found to cause a child to need services are autism, deaf-blindness, deafness, emotional disturbance, hearing impairment, mental retardation, multiple disabilities, orthopedic impairment, other health impairment due to chronic or acute health problems, specific learning disabilities, speech or language, traumatic brain, injury and visual impairment including blindness: and in the case of a child that is of preschool age, developmental delay.

Each school district is required to annually provide notice describing the *identification* activities and the procedures followed to ensure confidentiality of personally *identifiable information*. This notice is intended to meet this requirement.

*Identification activities* are performed to find a child who is suspected of having a disability that would interfere with his or her learning unless special education programs and services are made available. These activities are sometimes called *screening activities*. The activities include review of group data, conducting hearing and vision screening, assessment of student's academic functioning, observation of the student displaying difficulty in behavior and determining the student's response to attempted remediation. Input from parents is also an information source for *identification*. After a child is identified as a suspected *child with a disability*, he or she is evaluated, but is not evaluated before parents give permission for their child to be evaluated.

1. During the first 3 months of each new school year KWPP will engage in activities and procedures to seek students suspected of having a disability. The Special Education Coordinator and nurse will coordinate screening all new students in the following areas (varies with grade):
  - (a) Vision
  - (b) Hearing
  - (c) Academics
  - (d) Emotional Behaviors
  - (e) Communication
2. KWPP will offer parent information sessions outlining the Special Education Department and highlighting issues to be aware of when parents suspect a disability may be impacting their child's performance.
3. The Special Education Coordinator and Administrator will develop and distribute information on how to spot potential disabilities.
4. Teachers will receive and be trained on academic and behavioral checklists designed to identify areas of concern.
5. All students identified as suspicious will be referred for regular education intervention and review by the Early Intervening Team (EIT)
6. All student data will be reviewed by the EIT who will determine regular education interventions or referral for a full special education evaluation.
