**Report on the progress made in attaining the goals of the wellness policy (REQUIRED):**

Goals for Nutrition Promotion

PROGRESS UPDATE: As we transition back to eating in cafeterias, we need to ensure that all locations have updated, age appropriate materials posted where food and beverages are served to students. This includes the kitchens in 2 new buildings we opened in 2022. Materials will highlight and promote the value of good nutrition.

Comprehensive assessments have been performed on 3 school cafeterias to identify opportunities to maximize space, streamline logistics to enable schools to offer high quality food with the addition of new equipment.

Goal for Nutrition Education

PROGRESS UPDATE:

Menus with nutritional standards and translated in different languages are available for families to access online. Copies are also sent home to families to encourage healthy eating. Families often contact the school to address any concerns with food offerings and special dietary needs of their student. Curriculum and interactive lessons focused on nutrition have been incorporated in student health, physical education and science classes. Examples include projects on sugar, meal planning and understanding the nutritional value on food labels.

Goals for Physical Activity

PROGRESS UPDATE:

Our schools continue to provide health/physical education under the supervision of a properly certified teaching staff member as required by the Pennsylvania Department of Education. In 2021, our schools hired Learning Extension Program Managers, responsible for developing partnerships with community organizations and identify opportunities for students to participate in after school activities including but not limited to cooking, dance, cycling and sports: intramural basketball, flag football, soccer, running and pickle ball. These programs continue to increase the physical activity of our students, beyond the regular school day.
